PERSONAL PROFILE

First Class Honours BSc (Hons) Computer Science graduate specialising in Security and Forensics, with customer-facing technical support experience as a Professional Services Engineer at Ocuco. Experienced in troubleshooting software and SQL database issues, managing customer-reported problems, communicating technical findings to technical and non-technical audiences, and producing clear documentation. Strong technical foundation across SQL, REST APIs, cloud technologies and web applications, supported by extensive customer service and time-critical problem-solving experience.

Key Skills

Technical Support: Customer Support, Troubleshooting, Incident Investigation, Ticket Management, JIRA, Customer Communication, Technical Documentation

Data & APIs: SQL, PostgreSQL, Microsoft Excel, REST APIs, Django REST Framework, Relational Databases, AI-Assisted Data Processing

Web & Cloud: Python, Django, JavaScript, HTML, CSS, Docker, Google Cloud Platform, Linux, Git, GitHub

Professional: Stakeholder Communication, Training, Team Collaboration, Time Management, Prioritisation, Decision-Making

PROFESSIONAL EXPERIENCE

Professional Services Engineer Placement – Ocuco *January 2025 - September 2025*

- Delivered customer-facing technical support for enterprise software, investigating application and data issues.
- Used SQL and structured investigation to diagnose customer-reported software and database issues and progress them towards resolution.
- Managed and prioritised support tickets in JIRA, maintaining clear communication with customers and colleagues.
- Maintained callback reports and support logs in Microsoft Excel.
- Produced technical documentation, investigation updates and user guidance.

AI Data Extraction Assistant – SAM360 *2021 - 2022*

One-year work experience role completed alongside QQI Level 5 studies | Python, Web Scraping, AI Models, Data Processing

- Supported AI-assisted web-data extraction and processing workflows using Python and web scraping.
- Evaluated data outputs and contributed to improving data quality and usability.

Owner / Manager - Baggot's Bar & Lounge, Clara, Co. Offaly *1995 - 2021*

- Managed end-to-end business operations including customer service, budgets, suppliers, staffing, compliance and administration.
- Led staff and resolved customer and operational issues in a fast-paced environment requiring timely decisions, diplomacy and effective prioritisation.
- Managed supplier relationships and commercial negotiations, reducing procurement costs by 10%.

Funeral Director *1995 - 2021*

- Managed sensitive, time-critical client engagements, coordinating families and service providers with discretion and clear communication.

TECHNICAL PROJECTS

Stay & Trek - Full-Stack Geospatial Web Application & Mobile Prototype

Final Year Project | Python, Django, Django REST Framework, PostgreSQL, SQL, JavaScript, Docker, Google Cloud Platform

- Engineered a cloud-hosted web and mobile platform integrating hiking trails, accommodation and live weather information.
- Designed, developed and tested REST APIs and investigated application, API and data issues using structured troubleshooting.
- Integrated external APIs, containerised the application with Docker and deployed infrastructure on Google Cloud Platform.

EDUCATION AND TRAINING

BSc (Hons) Computer Science - Technological University Dublin

Awarded First Class Honours GPA 3.6 | 2026

Specialisation: Security and Forensics

Selected results: Advanced Web Mapping 85% (A1), Final Year Project 79% (A2), Advanced Security 1 A2, Forensics A2, Systems Software A3, Geographical Information Systems A3, Enterprise Application Development B1.

Relevant study: Databases, Software Engineering, Networking, Security, Cloud Technologies.

QQI Level 5 – Computer Systems and Networks, LOETB | Distinction | 2022

ADDITIONAL INFORMATION

- Full clean driving licence and own transport.
- Interests: Software development, cybersecurity, open-source projects, videography, community events, running, hiking and GAA.
